## Mobile County Public Schools Offers [FlinnPREP™](#) Online Interactive Courses for Advanced Placement® Science Students

*FlinnPREP™ from Flinn Scientific provides anytime access to AP® content and [practice exams](#) to enhance student achievement*

**Batavia, IL, January 19, 2018** – Mobile County Public Schools now offers students enrolled in AP Chemistry, AP Biology, AP Environmental Science and AP Physics 1 classes full access to FlinnPREP™ [online interactive courses](#) to complement the current curriculum. Each respective course supports in-class instruction while providing in-depth content, assessments, checks for understanding, and practice exams to fully prepare students during the school year and leading up to the AP exams in the spring.

FlinnPREP™ was developed by [Flinn Scientific](#) in partnership with a select team of AP teachers across the United States. Each course includes up to 15 units of foundational and AP level content that give students the opportunity to assess their knowledge, challenge their learning, and strengthen their skills as they progress through the year. The courses are designed to keep students engaged by incorporating graphics, videos, animations, games, and multiple reteach options. With the ease of access to the courses outside of the classroom and on any device, students can evaluate their mastery of the content at any time and teachers can use the progress monitoring reports to tailor their instruction.

“In support of our Strategic Plan, Mobile County Public Schools has made an investment in our AP science program as another means to propel college readiness while providing our students access to new technologies that foster engaged learning,” said Stephanie LeGrone, Science Supervisor for Mobile County Public Schools. “We are committed to increasing student achievement by providing the best available tools that will promote teacher effectiveness in the classroom and develop student confidence.”

“Flinn Scientific’s mission is to partner with schools so they can deliver a complete science program. FlinnPREP™ offers the latest technology and content-rich material aligned to current standards, uses various methods to deliver the content, and provides teachers with data

enabling them to teach precisely to the individual needs of AP students and manage their progress,” said Mike Lavelle, President and Chief Executive Officer for Flinn Scientific. “Our alliance with Mobile County Public Schools through the implementation of the Flinn*PREP*<sup>™</sup> courses brings us closer to the classroom and to the teachers who set the path to success for students. We are excited about the journey.”

### **ABOUT FLINN SCIENTIFIC**

Recognized by science teachers as a leading source of teaching and learning resources, Flinn Scientific partners with educators to provide materials, guidance, and inspiration to help teachers and students succeed. Flinn Scientific is based in Batavia, Illinois and was founded in 1977. Its primary mission is to support science educators and make a positive impact on student achievement in the science classroom and laboratory. Flinn Scientific is committed to unsurpassed customer service by providing the science community with the very best science education supplies, safety information, instructional materials and programs to facilitate their vital work. Over 150,000 science educators rely on Flinn Scientific annually for resources in science teaching and learning and for district science education solutions.
