1. Configuration for Li	21. Configuration for Al
2. Configuration for K^{1+}	22. Configuration for Si
3. Valence configuration for Na	23. Configuration for P
4. Noble gas “core” in Mg	24. Configuration for S
5. Configuration for Be	25. Configuration for Cl
6. Configuration for He	26. Valence configuration for C
7. Valence configuration for Sr	27. Valence configuration for Cs
8. Configuration for B	28. Valence configuration for Mg
9. Valence configuration for Li	29. Valence configuration for Al
10. Valence configuration for N	30. Valence configuration for Si
11. Valence configuration for Be	31. Valence configuration for P
12. Configuration for O	32. Valence configuration for S
13. Valence configuration for Ne	33. Valence configuration for Cl
14. Valence configuration for F	34. Valence configuration for K
15. Valence configuration for Ar	35. Valence configuration for Rb
16. Configuration for C	36. Valence configuration for Br
17. Configuration for N	37. Configuration for H
18. Configuration for F	38. Valence configuration for Ga
19. Configuration for Na	39. Configuration for Sc
20. Configuration for Mg	40. Configuration for Ti
