Always Means Always
Say it and mean it, “Always wear eye protection.” Goggles and safety glasses don’t protect when they’re not worn properly.

Make the Right Choice
Know the difference between goggles and safety glasses. Match the eyewear to the hazard for best protection.

Beware of Incoming
It’s not just chemicals—glassware can break unexpectedly, and sharps and debris fly.

Keep Them Clean
Always have clean goggles and safety glasses available. Dirty eyewear impairs vision and may lead to accidents.

Keep Flushing
If a chemical splashes into your eyes, remove contact lenses immediately and flush your eyes for at least 15-20 minutes.

Respect the Eyewash
Make sure it is easily accessible; a few seconds can make a big difference.
