

Student Record Sheet

Before: Describe the location of your microbe sampling spots

After: Describe the microbe growth in each quadrant. Draw sketches of growth patterns.

Post-Lab Questions *(Use the spaces provided below.)*

1. Were any of the surfaces free of microbes? Explain.
2. Which location seemed to have the most microbes? Explain.
3. Which location seemed to have the greatest variety of microbes? Explain.
4. How could you rid these surfaces of microbes?
5. Design an experiment to test your answer to question 4.
