

Urinalysis Worksheet

Data Table

Factor	Person V	Person W	Person X	Person Y	Person Z
Color					
Specific Gravity					
pH					
Sugar					
Protein					

Post-Lab Questions

1. What individual has the most “normal” overall urine test results? Explain your choice.
2. Which individual may have diabetes and should be tested further for diabetes? Explain your choice.
3. Discuss the urine test results for individual X. What results indicate the need for further testing?
4. Compare the urine test results for individual V and individual W. Should further testing be done? Explain.
