

SPF Worksheet

1. Record the three sunscreen products tested—brand names and SPF rating.
2. Why was the strip of black construction paper included in this experiment?
3. Use the results of the sun print paper above to discuss the relationship between the SPF number of a sunscreen and its ability to screen for UV radiation.
4. Describe an experiment using sun print paper that might demonstrate the relative effectiveness of different brands of sunscreen.
5. Describe an experiment using sun print paper that might prove or disprove the following statement— “Sunglasses are better filters of UV light than are sunscreens.”
