

Post-Lab Questions

1. Define the following terms—biosphere, population and habitat.
2. Define biotic and abiotic factors. List specific examples of biotic and abiotic factors found in one of the habitats from the Habitat Hold 'Em game.
3. What would happen if a predator organism was removed from a certain habitat?
4. In general, are there more tertiary consumers or producers in a healthy habitat? Why?
5. Pick one of the food chains created from the Habit Hold 'Em game. Create a food web by drawing other organisms from that habitat that may eat or be eaten by the creatures in that chain. Draw at least five additional organisms.
6. Draw a food chain and food web for organisms living in your area.
