## Vanishing Valentine Demonstration Worksheet

## **Discussion Questions**

1	Descri	he who	t hann	ened in	this	demon	stration.

2. The color changes in this demonstration involved both reversible and irreversible reactions. Which color change do you think was due to an irreversible reaction? Which color change was due to a reversible reaction?

3. By shaking the flask, oxygen is introduced to the solution, oxidizing the colorless dihydroresorufin into pink resorufin. When the solution is colorless, why do you think there is a pink tinge at the very top of the solution?

4. What is an oxidation-reduction reaction?
