## Thionin—The Two-Faced Solution Demonstration Worksheet

## **Discussion Questions**

1.	Describe what happened	ed in this d	lemonstration.	Include the	apparatus and	chemicals	used.

2. Thionin can exist in two forms, a purple oxidized form and a colorless reduced form. What chemical served as the reducing agent in this demonstration?

3. Based on what you observed, what else needs to be present for the thionin to be reduced?

4. Is this reaction reversible? What evidence do you have of this?
