

Sanitizer

Washing their hands continuously isn't always an option for your students. When stored and used properly, hand sanitizer is the best and safest option to keep hands clean.

Don't forget to check the percentage of alcohol in your sanitizer. Flinn Sanitizers are made with 80% ethanol in different options including:

- Multi-purpose Spray: Safe and gentle for hands, but strong enough for all surfaces with a fine spray nozzle that prevents waste
- 1 gallon and 55 gallon FDA-grade gel sanitizer, perfect for refilling hand sanitizer stations and classroom bottles
- Small, portable hand sanitizers suitable for distributing to individual students or staff. Perfect when you want a standard squirt of sanitizer for your hands.

CDC RECOMMENDS:

CDC recommends using ABHR with 60-95% alcohol in healthcare settings. Unless hands are visibly soiled, an alcohol-based hand rub is preferred over soap and water in most clinical situations due to evidence of better compliance compared to soap and water. Hand rubs are generally less irritating to hands and are effective in the absence of a sink.
