

## Signage

As communication and safety has become critical, we've created signs to support businesses and education institutions to share important health and safety information.

From social distancing to hand washing, signs communicate vital safety information. Our offering of safety signs meet the needs for many businesses and schools to fit a variety of applications related to current events. Our signs are fabricated from lightweight, waterproof 1/32" plastic, making them easy to install, clean and sanitize. Great for indoor applications.

### CDC RECOMMENDS:

#### Signs and Messages

Post signs in highly visible locations (e.g., school entrances, restrooms) that promote everyday protective measures and describe how to stop the spread of germs (such as by properly washing hands and properly wearing a cloth face covering).

Broadcast regular announcements on reducing the spread of COVID-19 on PA systems.

Include messages (for example, videos) about behaviors that prevent the spread of COVID-19 when communicating with staff and families (such as on school websites, in emails, and on school social media accounts).
